This memorandum is in response to your requirement dated 3 December 1964 which requests a scaled photo enlargement of Plant 67 with facilities reported in reference c keyed to this photograph. Also requested were the dimensions of the major buildings within the plant boundries.

25X1D

- is the best coverage of Moscow/ Reutov Plant 67 to date and has been used for the determination of all dimensions found in this memorandum. All measurements were made by the CIA/PID analyst and should not be construed as official NPIC/Technical Intelligence Division mensuration data. Dimensions are considered to be accurate to within - five feet.
- 3. The numbered facilities in Reference c are identified as the same facilities having corresponding numbers on the enclosed annotated photograph. The table of dimensions is also keyed to this photograph. The total amount of floor space is considered a minimum since three of the annotated buildings have an unknown number of stories and numerous small buildings have not been measured. Building 16 was under construction on the date of this photography but was

25X1D observed complete or nearly complete on | Buildings 2, 3 and 7 have more than one roof level. The highest level of each is indicated in the table of dimensions.

25X1A The photo analyst on this project is contacted on extension 2705 should you have any further questions concerning this project.
